Kaju Katli / Burfi Cutter

Precious Product needs precise finishing.

All operations of making Kaju Katli such as washing, grinding, mixing, cooking, cooling, spreading, rolling, sheeting, covering silver foils and cutting were conducted manually and precisely. Especially manual Sheeting and Cutting process takes much time and Uniform rolling, sheeting and cutting were challenging jobs for workers on different sizes of boards and rollers.

Maxon Kaju Katli Cutter is developed for those who need uniformity in cutting with limited manpower at economic range.

Applicable for

- ◆ Kaju Katli
- ◆ All types Burfi
- ◆ Mewa Bites
- ◆ Chikki
- ◆ Health Bar

TECHNICAL SPECIFICATIONS

- Machine Structure: SS 304
- Machine Dimension: 2000 mm x 1040 mm x 800 mm (L x W x H)
- Power Consumption: 220v AC Single Phase 50/60Hz 580watt
- Food Grade Imported White Conveyer belt
- Conveyor Gear Motor:0.25 HP
- Ac drive Make Danfoss for conveyor : 0.25hp
- Take Off and Driven Roller
- SS control panel
- Imported HSS Cutting Blade with Gear motor for cutting
- Blade cutting unit : Ac drive make Danfoss or Delta : 0.25hp
- Blade assembly with ss cover
- Bearing housing: SS304
- Bearing make: SKF/ HCH
- SS leg pad for height adjustment
- SS motor guard
